# ...Tanto en las convocatorias cPPP...

## Topic: ICT-11-2018-2019: HPC and Big Data enabled Large-scale test-beds and Applications

Scope: The *Internet of Things* and the *convergence of HPC, Big Data and Cloud computing* technologies are enabling the emergence of a wide range of innovations. Building *industrial large-scale application test-beds* that integrate such technologies and that make best use of currently available HPC and data infrastructures will accelerate the pace of digitization and the innovation potential in Europe's key industry sectors (for example, *healthcare, manufacturing, energy, finance & insurance, agri-food, space and security*).

## Topic: ICT-12-2018-2020: Big Data technologies and extreme-scale analytics

Scope: Rapidly increasing volumes of diverse data from distributed sources create challenges for extracting valuable knowledge and commercial value from data. This calls for *novel methods, approaches and engineering paradigms* in analytics and data management. **Research and Innovation Actions** developing *new big data analytics methodologies and engineering solutions* addressing *industrial and/or societal challenges*.

# ...Tanto en las convocatorias cPPP...

**Topic: ICT-13-2018-2019: Supporting the emergence of data markets and the data economy**

Scope: *The lack of trusted and secure platforms and privacy-aware analytics methods for **secure sharing of personal data and proprietary/commercial/industrial data** hampers the creation of a data market and data economy by limiting data sharing mostly to open data.*

- a) *Innovation Actions for **setting up and operating platforms** for secure and controlled sharing of "closed data" (**proprietary and/or personal data**). The actions should address the necessary technical, organisational, legal and commercial aspects of data sharing/brokerage/trading, and build on existing computing platforms*
- b) *Research and Innovation Actions to **advance the state of the art** in the scalability and computational efficiency of **methods for securing desired levels of privacy of personal data and/or confidentiality of commercial data**, particularly when they are combined from multiple owners.*

# ...como más allá de la cPPP...

## Topic: ICT-14-2019: Co-designing Extreme Scale Demonstrators (EsD)

Scope: These applications will address Big Data and extreme scale computing challenges combining fast response times, and advanced Big Data analytics and High-Performance Computing techniques.

## Topic: DT-ICT-11-2019: Big Data Solutions for energy

Scope: Innovation Actions targeting large-scale pilot test-beds for big data application in the electricity sector enabling the integration of relevant digital technologies like IoT, artificial intelligence, cloud and big data services.

## Topic: DT-ICT-10-2018-2019: Interoperable and smart homes and grids

Scope: Exploit IoT reference architectures models that allow for combining services for home or building comfort and energy management, based on platforms that enable the integration of relevant digital technologies like IoT, artificial intelligence, cloud and big data services and where applicable, combined with blockchain technologies.

## Topic: DT-ICT-05-2020: Big Data Innovation Hubs

# ...o incluso más allá de ICT-LEIT...

## Convocatoria INFRA – Protección de Infraestructuras Críticas:

EXAMPLE

**Topic: SU-INFRA02-2019: Security for smart and safe cities, including for public spaces**

Scope: *The security and good operation of a smart and safe city relies on interconnected, complex and interdependent networks and systems: public transportation networks, energy, communication, transactional infrastructure, civil security and law enforcement agencies, road traffic, public interest networks and services.*

*Such networks provide with an **efficient infrastructure for detection resources and "big data" collection***

## Convocatoria SEC – Security:

**Topic: SU-FCT03-2018-2019-2020: Information and data stream management to fight against (cyber)crime and terrorism [abre los 3 años]**

Scope: *Large amounts of data and information from a variety of origins have become available to practitioners involved in fighting crime and terrorism. Full advantage is not currently taken of the most **advanced techniques for Big Data analysis, and artificial intelligence**.*

Expected Impact: *Medium term: improved support for the work of Law Enforcement Agencies in **managing Big Data**, i.e. in extracting, combining, analysing and visualising large amounts of structured and unstructured data in the context of criminal investigations;*

# ...o incluso más allá de ICT-LEIT...

## Convocatoria SFS – Seguridad Alimentaria:

### **Topic: LC-SFS-03-2018: Microbiome applications for sustainable food systems**

Scope: Activities shall optimise the use of pre-existing databases and research infrastructures (including the distributed and virtual ones) and the **opportunities granted by big data management tools**, thus ensuring interoperability, standard methods and enhanced networking.

### **Topic: SFS-37-2019: Integrated approaches to food safety controls across the food chain (*EU-China FAB Flagship initiative*)**

Scope: Food safety risks occur along the food chain from a number of biological and chemical contaminants. In addition, malpractices or fraudulent practices could also lead to increased food safety risks. Improving risk assessment and monitoring, **including the use of big data**, is of major importance. Developing integrated approaches along the entire food chain for detecting, assessing, and mitigating relevant pathogens and contaminant hazards is essential.

# ...o incluso más allá de ICT-LEIT...

Convocatoria Acción por el Clima, Medio Ambiente,  
Eficiencia de Recursos y Materias Primas:

**Topic: SC5-11-2018: Digital solutions for water: linking the physical and digital world for water solutions**

Scope: Actions should develop and test new, robust and cybersecure systems, linking the physical and digital world to ensure tailored, water-smart solutions, to **exploit the value of data for the water sector** and to foster higher information transparency and accountability.

**Topic: SC5-09-2018-2019: New solutions for the sustainable production of raw materials**

**b) Digital mine (2019)**: Actions should develop an **Industrial Internet of Things (IIoT) platform** to significantly enhance the efficiency of mining operations by connecting cyber and physical systems and devices to **extract valuable insights from their data**, in order to **improve the decision-making process**, better address customer requirements, and to address health and safety aspects, environmental performance, increased automation, **predictive maintenance**, resource efficiency and **real-time coordination of operations**.

# ...o incluso más allá de ICT-LEIT...

## Convocatoria Energía:

**Topic: LC-SC3-EE-13-2018-2019-2020: Enabling next-generation of smart energy services valorising energy efficiency and flexibility at demand-side as energy resource**

Scope: *The use of 'big data' generated by smart meters, equipment, sensors and tools for standardised processes enabling a more accurate and dynamic measurement and verification of energy savings and flexible consumption, also in order to ex-ante identify and develop business opportunities.*

**Topic: LC-SC3-ES-5-2018-2020: TSO – DSO – Consumer: Large-scale demonstrations of innovative grid services through demand response, storage and small-scale (RES) generation**

Scope: *The markets and platforms should enable the integration of relevant digital technologies like Internet-of-Things, Artificial Intelligence, cloud and big data services.*

**Topic: LC-SC3-SCC-1-2018-2019-2020: Smart Cities and Communities**

Scope: *Projects should also deliver practical recommendations arising from project experience on big data, data management and digitalisation*

# ...o incluso más allá de ICT-LEIT...

## Convocatoria Logística:

**Topic: LC-MG-1-10-2019: Logistics solutions that deal with requirements of the 'on demand economy' and for shared-connected and low-emission logistics operations**

Scope: *These actions should clearly provide inputs for the preparation and implementation of sustainable urban logistics plans (SULPs) and/or SUMPs and other planning (private and public side) tools, such as **big data** and real-time traffic management*

## Convocatoria Aviación:

**Topic: MG-3-1-2018: Multidisciplinary and collaborative aircraft design tools and processes**

Scope: *Significantly advance user-centric visualisation methods and tools as well as **big-data analytics**... Development of **synergies on visualisation methods and big-data analytics***

## Convocatoria Sistemas de Transporte Inteligente:

**Topic: MG-4-5-2019: An inclusive digitally interconnected transport system meeting citizens' needs**

Scope: *Merging physical transport assets like infrastructure or vehicles with the digital layer, through the Internet of Things (IoT) and big data applications*

# ...o incluso más allá de ICT-LEIT...

## Convocatoria Conducción Autónoma:

EXAMPLE

**Topic: MG-3-3-2018: "Driver" behaviour and acceptance of connected, cooperative and automated transport**

Scope: Perform simulations, correlate and analyse driver behaviour/reaction under different scenarios/use cases, including driver distraction/assistance, driver-vehicle interaction technology failures and/or conditions instigating accidents (either by the vehicle itself or by other/external factors), as well as in different operating environments (e.g. urban, rural, multimodal hub) with other users, **utilising big data analytics**, assessing impacts of traffic flows, schedule reliability and congestions and also developing appropriate mitigation solutions to enhance "driver" behaviour under such scenarios (including using visual and acoustic information).

**Topic: DT-ART-04-2019: Developing and testing shared, connected and cooperative automated vehicle fleets in urban areas for the mobility of all**

Scope: Develop architecture, functional and technical requirements for ICT technologies, for secure data collection and processing needed for the operation of connected and cooperative automated vehicles. Develop ways to enhance the optimised **use of big data in (road) transport** for implementing smart and safe mobility solutions, innovative traveller services and (city) traffic management.

# ...o incluso más allá de ICT-LEIT...

## Convocatoria Vehículo Verde:

**Topic: LC-GV-02-2018: Virtual product development and production of all types of electrified vehicles and components**

Scope: *Digitalization and optimisation of electrified vehicles and components production processes utilizing virtual tools, big data and connectivity;*

## Convocatoria TDS – Soluciones Digitales Confiables:

**Topic: TDS-02-2018: Toolkit for assessing and reducing cyber risks in hospitals and care centres to protect privacy/data/infrastructures**

Scope: *Digital technologies such as Big Data, Internet of Things, Robotics, Artificial Intelligence, High Performance Computing, Cloud and Cybersecurity offer new opportunities to transform healthcare systems and delivery, Connected medical devices, in particular if linked to Clinical Information Systems, can bring increased patient safety and efficiency into healthcare system(s). Development and implementation of innovative methods, tools, guidelines or best practices addressing the need for cybersecurity in hospitals including remote care and homecare settings e.g. for assessing risks and vulnerabilities of hospitals w.r.t cyberattacks.*

# ...o incluso más allá de ICT-LEIT...

EXAMPLE

## Convocatoria Espacio:

### Topic: SPACE-11-TEC-2018: Generic space technologies

e) **Ground systems with massive processing:** data processing capabilities of missions for different applications, including ground control stations for remote sensing operations; processing power and speed, post-processing, data fusion, data networks, configuration life-cycle management and operations (particularly for constellations, including mega-constellations), integration of new technologies in ground systems and data processing (**big data archiving and retrieval, smart data optimisation, automated data processing, distributed data platforms, artificial intelligence, full automation, distributed data exploitation platform.**)

### Topic: SPACE-16-TEC-2018: Access to Space

b) **Launch system advanced manufacturing (e.g. tooling and machines) and modern infrastructures (including ground infrastructures for low cost European launch sites):** Activities shall address technologies and processes applied to launch systems development, production, testing and operations such as automation of activities (e.g. automated guided handling tools, automated integration, and inspection, collaborative robots, automated testing), digital technologies to the benefit of quality and costs equipment (digital assistance to operators, **big data processing for continuous improvement**), advanced materials with accent on low-cost manufacturing processes...

# ...o incluso más allá de ICT-LEIT...

Convocatoria Espacio:

EXAMPLE

**Topic: DT-SPACE-EGNSS-2-2019-2020: EGNSS applications fostering digitisation**

*The proposed EGNSS applications may integrate digital technologies like Internet of Things (IoT), cloud computing, **big data** and robotics.*

**Topic: DT-SPACE-25-EO-2020: Copernicus **big data algorithm factory****

# ...o incluso más allá de ICT-LEIT...

## Convocatoria Sociedades Innovadoras, Inclusivas y Reflexivas:

**EXAMPLE**

### Topic: TRANSFORMATIONS-13-2019: Using big data approaches in research and innovation policy making

Scope: To exploit the potential of **big data approaches for R&I policy making** by providing more timely and in depth information on the performance of the R&I system and its links to productivity growth. Proposals should aim at exploiting the **potential of big data to produce information on R&I activity, performance, output and/or impact** which has the potential to be **available in real time**, focusing notably on R&I investments in the private sector, public-private cooperation and technology diffusion between private actors. Proposals should also take into account aspects of **data accuracy** and **data security**.

### Topic: DT-TRANSFORMATIONS-02-2018-2019-2020: Transformative impact of disruptive technologies in public services

Scope: The challenge is to assess the potential **benefits and risks** of using disruptive technologies (such as block-chain, **big data analytics**, **Internet of Things**, virtual reality, augmented reality, **artificial intelligence**, algorithmic techniques, simulations and gamification) in Public Admins as well as the **social impact**, including the impact on public servants, of using them for government processes and governance (e.g. for registers, for archiving, for decision-making processes, etc.).

# Big Data integrada en diversas ERA-Nets temáticas

## CONVOCATORIAS COFUND (SUBVENCIÓN)

Medicina Personalizada

H2020-SC1-2016-2017

**ICT & BIG DATA FOR HEALTH**

Convocatoria: 12 febrero 2018  
22 países | 31,6 M€

[www.icpermed.eu/en/services-opportunities.php](http://www.icpermed.eu/en/services-opportunities.php)

Sistemas Energéticos Inteligentes

H2020-LCE-2016-2017

ATIONS  
esolución  
2018-2019

# ...pero siempre alineados con la BDV SRIA.

- Alineamiento de objetivos.
- Re-utilización de tecnología.
- Mejor uso de los recursos.
- Mayor impacto.
- Mejor conocimiento del entorno de aplicación.
- Contribución común a un objetivo único.

# En el Futuro...

- Prestad atención a las convocatorias BDV PPP.
- Identificad referencias al uso de técnicas de Big Data en otras partes de H2020.
- Evaluad siempre la conveniencia de utilizar Big Data para resolver los retos presentes en los diferentes verticales de los Retos Sociales.
- Prestad atención a iniciativas como la de Digitalización y otras Focus Areas similares que pretenden extender el uso de las TIC en otros sectores.

# En el Futuro...

- Infoday nacional del programa de Seguridad en IFEMA el día 20 de febrero.
- Infoday nacional sobre ERA-Nets en CDTI el día 13 de febrero (provisional).
- Desarrollos concretos a través de otros programas, como los ofrecidos por CDTI y ERA-Nets.
- Consultad siempre con los diferentes Puntos de Contacto Nacional.
